# Our Whole Ticket.

OFFICIAL PAPER OF THE CITY.

We present to-day the entire city and ward ticket to be supported next Tuesday by the Republican Union Voters of this city. The whole ticket, collectively and severally is unexceptionable, and what is further therefare only threeor four men upon it but what have before served the city in the offices for which they are now nominated, and all of them have proved faithful, effiport of the Republican and Union Democratic voters of the City. Of those who have never before received the suffrages of the people, we wish to take some special of age. notice. Messrs. A. A. Jackson and Alex ander Oraham for Aldermen in the First Ward are new men for that office, but they are both old residents of Janesville and of the First ward, are men of intelligence and discrimination and take a lively interest in First Ward have at times been inclined to split up on several candidates, but we trust this year they will be satisfied that it Mr. A. MoDougal, nominated for Alder-

man in the Fourth Ward, is also a new candidate for support. He is an intelligent and enterprising mechanic, is an excollent and useful citizen, and we are sure these qualities will characterize him in bor. his official capacity. Dr. Pendleton is a new candidate for

School Commissioner. The Doctor is deservedly popular. He is well qualified by education and by force of character for the office. Both he and Mr. McDougal have a hard district in which to commence their political career, and we trust our friends in the "bloody Fourth" will make special | witnesses is admissible. offorts in their behalf on that account.

Mr. H. L. Smith, of the Third Ward, comes before the people for the first time for aldermanic honors. The office, we befor aldermanic honors. CONFIRMATION OF GEN. STARKWEATHER. -We observe that the nomination of Gen. Starkweather, as Brigadier General, has been confirmed by the Senate. He is a brave and faithful officer, and will in the future, as in the past, honor the service.

-It is a cheering sign that General Grant refuses to review the Army of the Potomac. Grant is not a holiday soldier, and does not believe in pageants or muster trainings. We believe he never reviewed an army but once, and that was after the battle of Mission Ridge. The Army of the Potomac has had too many reviews. A BEAUTIFUL PICTURE.-Mr. Porter, of the photographic parlors, has presented us with a magnificent steel engraving, entitled "The signing of the Compact in the Cabin of the Mayflower." It is not only very happy in design, but is a beautifully executed work of art, and appropriately framed would be a handsome ornament to any parlor. Mr. P. is the sole agent for the sale of these pictures in this city. They may be seen at his rooms.

BLUNDERS .- The TYPE made terrible work with the proceedings of the City Convention vesterday. They nominated by acclamation, Mr. Foord for Clerk instead of Treasurer, as the convention had it. Mr. Hudson for Treasurer instead of Police Justice, and Mr. Williston for Police Justice instead of Clerk; a most ridieuleus series of blunders. Also, in our notice of the several candidates, although we meant to speak highly of Mr. Hudson, we did not intend to "elevate" him to the Chief Justiceship. We have no doubt he would make a good one, but he does not, just now aspire to that distinction.

Rowdyish-An Outrage.-The entertainment at Lappin's Hall last evening. was seriously disturbed by a gang of blackguards and rowdies] who conducted themselves in a most outrageous and disgusting manner. They evidently had no self-respect, and consequently no respect for the large company of ladies and gentlement gathered in the hull. Their conduct was such as to make the face of every respectable citizen tingle with shame, that such things should be allowed in a promisenous assemblage of that kind. One thing cortain, teither these companies should be charged no license, or having procured one, they should be protected in the peaceful prosecution of their entertainment. People like to attend these places of amusement, and they ought to have the privilege of doing so without being insulted. Our city is getting an unenviable notoricty in this matter, and we trust the authorities will see to it in the future that no such disgraceful scenes are enacted. These young men should recollect one thing, too, which is that there is a vast difference between having a little innocent fun and making loafers of themselves. Those who pay their admission fee to an entertainment of this kind do not purchase thereby the privilege of conducting themselves in such a manner as to disturb others who are interested in whatever may be going, on. If they do not like the performance they have the privilege of going out quietly, but they have no right and should not be allowed to disturbe others. ADVANCE IN PRICES .- We understand

# FROM WASHINGTON.

WASHINGTON, April 1 .- Trilame's Special .- It is understood that Stebbins, Democratic incurber of ways and means committee, has pronounced himself in favor of large duties on foreign imports, even almost to prohibition and internal revenue tax, equal to all demands of the treasury for civil expenses of the Government, and interest on public debt.

Ould has given assurances to Butler that the body of Col. Dahlgren will soon be given up to his father.

Gen. Ord is to command the forces of Western Virginia. Sigel will command that department, but not conduct militia operations.

Herald's Special.—The naval committee has under consideration the difficulties of the transfer of senmen from the army to the naval service, and the subject will be brought before the Senate on Monday.

The reorganization of the army of the Potomue is still incomplete, waiting the confirmation of officers by the Senate.

# FROM NEW ORLEANS.

New York April 2 .- The New Orleans correspondent of the World states Browns fille and Rio Grande to be evacuated by our forces. Ringgold's cavalry force of the enemy has been augmented within a few days. It now amounts to about 5,000, encamped in a valley at the foot of Rocky Ridge, from Tunnell Hill to Varness Sta- FIRE, LIFE AND MARINE tion and Red Clay which they hold also.

There is a considerable force at Mickajack Gap, six miles below here. Their picket line is generally within a mile of ours, but no disposition is shown by either party to crowd. There is a very small rebel force of infantry north of Dalton.

### FROM TENNESSEE. There is no reason to believe Johnston

has been largely reinforced either from East Tonnessee or Alabama. No indications that he intends to assume offensive notwithstanding contradictory reports. The estimated force of 35,000 in Johnston's command is nearly correct. Over 900 deserters come into Chattaneega during the month of March. Receipts have fullen off for a few days past. The thinking and unbiased portion of the ecommunity will appreciate the great advantage of a permanent and reliable Institute for the cure of chronic diseases that results bettle the skill of the general practitioner.

Catarrh, that great promoting cause of Consumption in the Northwest, always gives way upon application of the new remedies. Dr. Hale has never encountered a case of this disease he could not cure. The present session is very favorable for applying proper remedies; delays are dangerous. Your case may be cured this month, not next, to-day, not to-morrow.

All who are suffering from any of the diseases Dr. Hale makes a speciality in treating, should at least call and investigate the new system for thermselves. No person of good sense and sound judgment will, without full and careful investigation, denounce as "humbug" that which claims to possess merit.

Dr. Hale takes pleasure in referring to the following treponsible pattles, citizens of Janeszille, who can apoak knowingly as to the cilicacy of Dr. Hale's treatment, not to mention hundreds of others in the Northwest that have been cured:

Ould has given assurances to Butler that the body of Col. Dahlgren will soon be given up to his father.

Gen. Ord is to command the forces of Western Virginia. Sigel will command that department, but not conduct militia merations.

Herald's Special.—The naval committee has under consideration the difficulties of the transfer of seamen from the army to the naval service, and the subject will be brought before the Senate on Monday.

The reorganization of the army of the Potomac is still incomplete, waiting the confirmation of officers by the Senate.

# FROM NEW ORLEANS.

New York April 2.—The New Orleans correspondent of the World states Brownsville and Rio Grande to be evacuated by our forces. Ringgold's cavalry force of the enemy has been augmented within a few days. It now amounts to about 5,000, encamped in a valley at the foot of Rocky Ridge, from Tunnell Hill to Varness Sta- FIRE, LIFE AND MARINE! tion and Red Clay which they hold also.

There is a considerable force at Mickaack Gap, six miles below here. Their picket line is generally within a mile of ours, but no disposition is shown by either party to crowd. There is a very small rebel force of infantry north of Dalton.

# FROM TENNESSEE.

There is no reason to believe Johnston has been largely reinferced either from East Tennesece or Alabama. No indications that he intends to assume offensive notwithstanding contradictory reports. The estimated force of 35,000 in Johnston's command is nearly correct. Over 900 deserters come into Chattanooga during the month of March. Receipts have fallen off for a few days past. Many thousands of veterans are marching overland from Nashville, the Rail Road being unable to accommodate them.

General Sherman having completed his tour of inspection, returned to headquarters at Nashville.

COLORED TROOPS .- The volunteering of negro troops in Maryland is going on bravely. The bounty by the State and the soldiers of that state in the field may city is \$500; Congress gives nothing. Col. Bowman has charge of the recruiting of there forces. He is a most accomplished officer. The Ninoteenth and Thirtioth United States colored regiments of his brigade are full. The Thirty-ninth and Forty-second are rapidly filling up. Mearly one-half of the slaves enlisting are unfit for military service, because of maltreatment and injuries in servitude. What n commentary on the diabolical system! The free negroes of Washington are far more able bodied. If the wife and children of the volunteering slave were freed by the enlistment of the husband, there would not be a slave left in Maryland fit for service who would not hasten to the war.

The excitement among the negro population is intense. A series of negro mass meetings has been and still is in progress. Judge Bond, R. Stackett Matthews, Senator Wilson of Massachusetts, and other white men have spoken. Mr. Campbell, Mr. Browser and other negro orators have won high distinction by their earnest speaking. It is admitted they were not a whit behind their white brother speakers. And all this amongst a people who, three years ago would have mobbed a negro mass meet-

# The Fronch Iron-Clad Navy.

A special correspondent of one of the London daily journals visited Cherbourg in February last, when through particular influences, he was allowed to examine the fleet and to obtain such information as he derived from the officers in command. The writer gives the preference to the French iron-clads over the English, being much more easily managed and steered, and making better weather. The I'rench officers, however, affect a great contempt for their rivals, and what 13 very remarkable is the circumstance that they are opposed to the use of this kind of vessels. The

England are more or less exposed happened at Sheffield. The great reservoir of the Sheffield water company-a reservoir nearly one hundred acres in extent, and which -General McPherson writes to Governor | had more than a million cubic feet of water, suddenly burst its embankment and itself. Almost before warning could be given the volume of waters began rushing hendlong down the velley, sweeping farms and houses, forges and factories, like chaff before it. Never, probably, before has an erty, so lamentably fatal in the loss of human life. Whatever the sudden and tremendous flood could reach it seems to have destroyed, and, calculating only by the number of houses swept away and the persons missing who were known to have been in them on that fatal night, there is every reason to fear that the lives sacrificed by 200, if they do not unfortunately exceed that number. Of the damage done to property is is impossible at this early date to form even a conjecture. The devastation in this respect is unparalleled. A large, populous and thriving district has been almost obliterated from the earth; senree more than traces of the houses and factories that once stood there now remaining. The Don, owing to late heavy rains, was unusually high, and the additional water thrown into it has laid hundreds of of loss. neres under water, and inflicted incalculaington to his friends in Missouri to culti- ble injury to the growing crops. Large numbers of people have lined the

river's banks all the day, but it is now evident that the greatest volume of water has passed by, and further damage is not apprehended. The water is very thickly impregnated with mud-a proof that it must have been swept with terrific violence over the land adjoining the river. Fishpike in particular- have been left in largo quantities on land, from which the water LATER,-Every additional inquiry made

into the circumstances of the appalling calamity shows that it has been much more disastrous than was at first anticipated. It is now estimated that the loss of life will exceed 250, and that the value of the property destroyed exceeds half a million. Between Wardsend and Sheffield, on the Don, the bodies were seen lying in the thirteen in a third. At Neepsend 900 acres of gardens were devastated, and who has been neglected in the matter of whole families were swept away. An official report just received, states that one hundred and fifty-six dead bodies have been found; seventy have been identified. Large numbers are not yet found. Bodies have been discovered as far down the river as Doneaster. Along the banks of the river, between that town and Sheffield, the scene of the inundation was visited by vast crowds on Sunday; the police and a strong military guard acted for the maintenance of order and the security of property. A movement for a general subscription was immediately commenced, and a meeting will be held to-morrow. COLORED TROOPS .- The volunteering of negro troops in Maryland is going on \_\_\_\_ The Maine Legislature has voted that bravely. The bounty by the State and the soldiers of that state in the field may city is \$500; Congress gives nothing. Col. Bowman has charge of the recruiting of these forces. He is a most accomplished officer. The Nineteenth and Thirtieth United States colored regiments of his brigade are full. The Thirty-ninth and Forty-second are rapidly filling up. Nearly one-half of the slaves enlisting are unfit for military service, because of maltreatment and injuries in servitude. What a commontary on the diabolical system! The free negroes of Washington are far more able bodied. If the wife and children of the volunteering slave were freed by the enlistment of the husband, there would not be a slave left in Maryland fit for service who would not hasten to the war.

The excitement among the negro population is intense. A series of negro mass meetings has been and still is in progress. Judge Bond, R. Stackett Matthews, Senator Wilson of Massachusetts, and other white men have spoken. Mr. Campbell, Mr. Browser and other negro orators have won high distinction by their earnest speaking. It is admitted they were not a whit behind their white brother speakers. And city. all this amongst a people who, three years ago would have mobbed a negro mass meet-

# The French Iron-Clad Navy.

A special correspondent of one of the London daily journals visited Cherbourg in February last, when through particula influences, he was allowed to examine the fleet and to obtain such information as he derived from the officers in command. The writer gives the preference to the French iron-clads over the English, being much more easily managed and steered, and making better weather. The French offieers, however, affect a great contempt for their rivals, and what is very remarkable is the circumstance that they are opposed to the use of this kind of vessels. The writer says:

"The French officers are of opinion. that, however unpulatable it may be to the French and British governments, the time must come when they will have to give to engines and coal the weight now appropriated to armor-plates, and in the interests of policy and humanity allow the shot and shell that may pass through a ship's side to pass through and through with no difficulty and few splinters. Indeed, they jeer at all our ships, and express a hope that, as we have been so mad as to build useless ships, we will now be wise enough to lead the way in the abandonment of iron-cluds altogether."

"Notwithstanding the alleged superiority of the Solferine and Magenta to all other iron-clads at the present time affont or building, the French officers concieve that ships without armor that would steam two knots or so more an hour, and carry a week's more coal, would be still more offective and better worth having.
"In matter of guns, the French officers

believe us to be perfectly insune. The 600-pounder fired with half a charge of powder, viz., with 70 pounds intend of 140 pounds, the service equivalent, only three times an hour—is a standing joke among them. For their part they desire nothing heavier than the old British 32-pounder, as when they exceed that weight the ships suffer in a heavy seaway, and in such a thirty six surviving."

case would be less efficient against an enemy. The favorito French gun, therefore is a gun throwing a 32-pound round shot or a 64-pound bolt, the guns possessing three plain grooves for the bolts. On board the Solferino and the Magentathe guns are all breech-loading 100-pounders, and it is not, perhaps, too much to say that in service, in a time of war, they would prove a total failure. Captain Tubuteau kindly orderod the unserewing of a breech for my in-spection, and fouling and derangement are inevitable.
"In the park of artillery at Cherbourg

the great reserve of guns is of the unpre-tending pattern of 1810, and in the park at Toulon the great reserve is as anciont ns 1790." If these statements are correct, it is ev-

ident the French marine does not rely much upon the efficiency of their iron-clads or their armaments.

Among them all there is scarcely one to be seen poorly attired. The goods of each party show that a small farmer's household has been broken up. Their conduct is remarkably steady. Though hundreds have sometimes to wait a week at Queenstown for the steamer, there is very little drunkenness among them, and seldom a " spree,' though they are noisy enough sometimes. The Examiner thinks that few of the emigrants are recruits; there is none of the swagger which so commonly betrays the aspirant for glory and bounty. It is true the passage is paid in many cases with American money, but it is with the money of their relatives to whom they are going. The Examiner denies that federal recruitng is in any important degree the stimu-flus to Irish emigration, and adds: "It arises out of the condition of the country and the dazzling, if not perfectly trust-worthy, prospects hold out by the labor market of the Northern States.

DISCOVERIES IN POMPEH,-Five new rooms have recently been brought to light in Pompeii, between the Via Abundantize and the Via Augusti, not far from the Forum. In one of them a great many pieces of bread wrapped up in napkins have been found, most of the napkins being still in good state of preservation. Among the the town; and the marine losses number other articles found, there is a beautiful hundreds of vessels; in most cases all of little seal, with the syllables ANT. MO. ongraved upon it. M. ### Awful Doluge at Sheffleld---Whole Vil lages Swept Away. [From the London Times, March 18.]

last one of those terrific disasters to which nearly all the great towns in the north of England are more or less exposed happen-ed at Sheffield. The great reservoir of the Sheffield water company—a reservoir nearly one hundred acres in extent, and which had more than a million cubic feet of water, suddenly burst its embankment and swept with the fury of another Deluge down the narrow gorge formed by the Loxley and Stannington hills into Sheffield Almost before warning could be itself. given the volume of waters began rushing headlong down the valley, sweeping farms and houses, forges and factories, like chaff before it. Never, probably, before has an accident of the same kind occurred so ruinous in its wholesale destruction of properry, so lamentably fatal in the loss of human life. Whatever the sudden and tre-mendous flood could reach it seems to have destroyed, and, calculating only by the number of houses swept away and the per-sons missing who were known to have been in them on that fatal night, there is every reason to fear that the lives sacrificed by this awful calamity, will not be less than 200, if they do not unfortunately exceed that number. Of the damage done to property it is impossible at this early date to form even a conjecture. The devastation in this respect is unparalleled. large, populous and thriving district has been almost obliterated from the earth; scarce more than traces of the houses and factories that once stood there now remaining. The Don, owing to late heavy rains, was unusually high, and the additional water thrown into it has laid hundreds of acres under water, and inflicted incalculable injury to the growing crops. Of the destructive character of the flood there were abundant evidences on every hand Timber in large quantities, bed-posts, feath, er beds, tables, clocks, and various kindsof household furniture passed down, and several careasses of cattle also.

Large numbers of people have lined the river's banks all the day, but it is now evident that the greatest volume of water has passed by, and further damage is not apprehended. The water is very thickly inpregnated with mud-a proof that it must have been swept with terrific violence over the land adjoining the river. Fishpike in particular- have been left in large quantities on land, from which the water has subsided.

LATER.-Every additional inquiry made into the circumstances of the appalling calamity shows that it has been much more disastrous than was at first anticipated. It is now estimated that the loss of life will exceed 250, and that the value of the property destroyed exceeds half a million. From Bradfield where the reservoir hurst, down the course of the river for twelve or fourteen miles the country is laid waste. The reservoir covered an area f seventy-six acres, and would hold 114,-000 cubic feet of water. The embank-ment, which crossed the end of the valley. was an enormous crection, with an average height of eighty-five feet, and forty feet in thickness. It was three hundred yards long. Between Matlock and Hillsborough, a distance of four miles, the greatest loss of life had been caused. Within this tract whole rows of houses have been swept entirely away, in three of which above there were 25 lives lost. In the opposite row the whole of the inhabitants drowned, and scarcely any of their bodies have been discovered. The flood seems to have swept off everything before it, from

the confluence of the Loxley and the Revilla, to the Don. Between Wardsend and Sheffield, on the Don, the bodies were seen lying in the mills and the mud and ruins. There were fourteen in one place, ten in another, and thirteen in a third. At Neepsend 900 whole families were swept away. An official report just received, states that one hundred and fifty six dead bodies have been found; seventy have been identified. Large numbers are not yet found. Bodies tion was immediately commenced, and meeting will be held to-morrow. The inhabitants of the submerged districts have lost everything, and an appeal for instant help will be made; hundreds have nothing -The committee appointed by the Ohio left of their property but their night in the workhouse, and the coroner said he had been informed there had been nearly two hundred found. He referred to a statement which is generally made and bewere lost there, but that the warning was

not sent to the thickly peopled districts below.
[From the Sheffield Telegraph, March 14.] From the large quantity of trees and brushwood brought down the river, the victims, who were for the most part drowned while escaping from their beds, are found bruised and quite nude, if nude those may be called who have received, instead of the night-dresses the drift-wood has removed, a thin clothing of clay. Some of the dead have an expression of fierco energy upon their faces, and their last act is expressed as well as words could express it by the expression of the face and the attitude of the arms. In one the teeth are clenched, and the right arm thrown forward as if striking at something; in others both arms are thrown forward in a swimming attitude and have so stiffened. In many cases the living have died in their beds without leaving any sign to show that the water had waked them, or that they had consciously passed from the sleep of life to the long, long sleep of death,

Several of those found have been as much dicate that they had first been crushed un-der the wreck of the houses and then washed out when the torrent imparted motion to the wreek, or else that they had been caught between drifting trees and beams,

The number of dead yet known does not exceed one hundred and eighty.

[Translated from the French.] After having played on the Plane of Mosses. Knabe & Co., it is impossible not to bear testimony to their qualities, which have acquired for them the eminent

reputation which they enjoy. The Pianes of their remanufacture, on which I have played, are exceedingly remarkable for their qualities. The base is powerful remarkable for their qualities. The bass is powered without hardness, and the upper notes sweet, clear and harmoniously mollow, (chrystaline,) and I do not hesitate to express in regard to these instruments my outlies attisfaction, and to declare that they are equal if find superior to the best manufactured in Europe or this country by the most celebrated makers.

TYATT'S IMPROVED Knife & Scissors Sharpener I An unequaled instrument for sharpening all kinds of

House Knives, Shears and Scissors.

This Machine is especially adapted to the wants of Honses, Hotels, Saloons and Shops. The principle on which the machine is constructed, and the rapidity, case and excellence of its operation have mover before been combined in an instrument to

sharje n selge toels.

The tirinding wheels are made of a solid composition of omery, and hence not only grind rapidly but are very durable, and being used with water, cannot effect the temper of a blade. The principle on which it operates -that of grinding both sides simultaneously—is an entirely new one and superior to all others, making it not only rapid in its

operation, but requiring comparatively no skill in its tre, and insuring a perfectly uniform edge, beseled alike on both edge, and of the best possible angle for unition.
In sharpening Phears and Scients each blaid is necessarily ground exactly to the same borel, and a keen, smooth cutting edge is obtained. In this respect, as well as in sharpening kulves, the machine is altogether superior to anything combronight before the public, and is certain to the coupleby satisfaction to all who and is certain to give complete satisfaction to all who Having the exclusive right to sell those machines in hils county, I shall call up in the citizens generally to introduce it to their notice. TO THE PUBLIC—In retiring from the Drug Business, with which we have so long been connected in the city of Janeaville, we have to thank our customers and friends for their many flavors. Our successors, Messac Camp & Williams, we know to be good druggists, who theretainly understand the profession. Our triends in the city and vicinity can always rely upon having their orders and prescriptions neatly and correctly filled in the old store. We invite for them a continuance of patronage so liberally bestowed upon us.

LIYATT'S IMPROVED Knife & Scissors Sharpener!

An unequaled instrument for sharpening all kinds of House Knives, Shears and Soissors.

This Machine is especially adapted to the wants of

Houses, Hotels, Saloons and Shops. The principle on which the machine is constructed, and the rapidity, case and excellence of its operation, have never below been combined in an Instrument to sharpen edge tools.

The Grinding wheels are made of a solid composition of emery, and hence not only grind rapidly but are very durable, and being used with water, cannot effect the temper of a blade. the temper of a blade.

The principle on which it operates—that of grinding both sides simultaneously—is an entirely now one and superior to all others, making it not only rapid in its operation, but requiring comparatively ne skill in its tree, and insuring a perfectly uniform edge, beveled alike on both sides, and of the best possible angle for certific?

at tan o'clock in the forencen of that day, on the slide-walk in front of the Myers House, in the City of Janes-wille, County of Boels and State of Wisconsin, all the following pieces or parcels of land described in said judgment as follows: "The following real estate, lying and whom an advertised as the northwest fraction and known and described as the northwest fraction number three (3), and the northeast quarter of section number three (3), and the northwest fraction number three (3) in town three (3) orth, of range number ten (10) east, containing in the aggregate one hundred and seventy-five areas of land." Datel February 10, 1824.

H. L. Palmer, Plaintiff A AU: 50 followers.

The above sele is postponed to the sixth day of April entities.

In charpening Shoars and Science such blade is necessarily ground exactly to the same borel, and a keen, anount cutting edge is obtained. In this respect, as well as in sharpening knives, the machinuis altogether superior to anything ever brought before the public, and is certain to give complete satisfaction to all who are it. use it.
Having the exclusive right to sell these machines in
this county, I shall call upon the citizens generally to
introduce it to their notice. They can also be seen at
